

ganization to contribute to the International Programme for the Development of Communication by making financial resources available as well as staff, equipment, technologies and training resources;

6. *Recalls* resolution 4/22 of 27 October 1980⁶⁰ concerning the reduction of telecommunication tariffs for news exchanges, adopted by the General Conference of the United Nations Educational, Scientific and Cultural Organization, and takes note of the efforts made by Member States in this respect;

7. *Reaffirms* its support for the United Nations Educational, Scientific and Cultural Organization, its Constitution and the ideals reflected in it;

8. *Invites* the Director-General of the United Nations Educational, Scientific and Cultural Organization to continue his efforts in the information and communication field and to submit to the General Assembly, at its forty-fourth session, a detailed report on the application of the International Programme for the Development of Communication as well as on the social, economic and cultural effects of the accelerated development of communication technologies;

9. *Reaffirms* the ongoing efforts of the United Nations Educational, Scientific and Cultural Organization, which retains the central role in the field of information, gradually to eliminate existing imbalances, particularly with respect to the development of infrastructures and production capacities, and to encourage a free flow and wider and better balanced dissemination of information with a view to the establishment of a new world information and communication order, seen as an evolving and continuous process, in accordance with the relevant consensus resolutions of the United Nations Educational, Scientific and Cultural Organization.

71st plenary meeting
6 December 1988

43/61. Science and peace

The General Assembly,

Considering that progress in science and technology profoundly affects international peace and security, economic and social development, respect for human rights and many other aspects of civilization and culture,

Considering also that political and economic decisions have a decisive effect on the direction of scientific research and the use of the results obtained thereby,

Recalling that scientific and technological achievements must be used to advance socio-economic progress and the effective enjoyment of human rights throughout the world,

Considering further that the arms race absorbs a substantial proportion of the scientific talent and financial resources used in related research and development, which, in a more peaceful and secure world, could be used to solve other pressing problems facing mankind,

Recalling that in its resolution 40/3 of 24 October 1985, by which it proclaimed the International Year of Peace, it recognized the role of science for peace,

Recalling also its resolution 42/13 of 28 October 1987 on the achievements of the International Year of Peace, in

which it urged Member States, intergovernmental and non-governmental organizations and the world community to persevere in their efforts, developing initiatives conducive to the objectives of the Year, and expressed the hope that the ideals and objectives contained in the Proclamation of the International Year of Peace would continue to be an inspiration for concerted action,

Affirming that it is necessary to promote greater awareness among scientists world wide of the usefulness of science to increase international peace, security and co-operation, the social and economic development of mankind, the promotion of human rights and the protection of the environment,

Affirming, in particular, the need for scientists to establish a free and open dialogue between one another, and with political leaders and the public in general, with regard to scientific developments and their present and potential implications for our civilization,

Considering the importance of encouraging scientists to work towards constructive objectives, to improve the climate for arms control and disarmament, and to promote a dialogue on important topics in connection with the positive contributions that scientific knowledge can make to peace, security and ecological balance,

Noting with appreciation the joint efforts made by scientists and members of other professional groups to promote the achievement of those aims through the holding of the First International Week of Scientists for Peace from 10 to 16 November 1986 and the Second International Week of Scientists for Peace from 9 to 15 November 1987,

Considering that the celebration each year of a special week of action devoted to the topic "Science and peace" is an important means of generating and increasing public interest in this topic and of stimulating activities and initiatives leading to the study and dissemination of information on the links between progress in science and technology and the maintenance of peace and security,

1. *Decides* to proclaim the "International Week of Science and Peace", which will take place each year during the week in which 11 November falls;

2. *Urges* Member States and intergovernmental and non-governmental organizations to encourage universities and other institutions of advanced studies, scientific academies and institutes, and professional associations and individuals in the scientific community to hold, during that Week, lectures, seminars, special debates and other activities conducive to the study and dissemination of information on the links between progress in science and technology and the maintenance of peace and security;

3. *Urges* Member States to promote international co-operation among scientists by facilitating exchanges of experts and information;

4. *Requests* the Secretary-General to draw the attention of Member States and interested organizations to the importance of the International Week of Science and Peace and invite them to report to him on their activities and initiatives in connection with this event, and to report thereon to the General Assembly at its forty-fifth session.
